

SLOW INTERNET SPEED

→ Check the number of connected devices. Disconnect unnecessary devices. Did this improve speed?

— YES →

**ISSUE
RESOLVED.**

NO

Is the MikroTik device placed in an open space clear of obstructions? Move objects that could be blocking the signal. Do not try to move your MikroTik device!

— YES →

If the issue persists after these efforts, contact DigitalC for assistance.

NO

Clear an area for your device to send the Wi-Fi signal to your home.
